NECK PAIN DISABILITY INDEX QUESTIONNAIRE

Please Read: This questionnaire is designed to enable us to understand how much your neck pain has affected your ability to manage your everyday activities.

Please answer each section by darkening the one bubble that most applies to you. We realize that you may feel that more than one statement may relate to you, but please, just pencil in the one choice which closely describes your problem now.

> Please use a No. 2 pencil to fill in your answer. Fill in bubbles completely as indicated here: Erase changes cleanly. Do not fold this form.

1. PAIN INTENSITY

- I have no pain at the moment.
- The pain is very mild at the moment.
- The pain is moderate at the moment.
- The pain is fairly severe at the moment.
- The pain is very severe at the moment.
- The pain is the worst imaginable at the moment.

2. PERSONAL CARE

- □ I can look after myself normally without causing extra pain.
- I can look after myself normally, but it causes extra pain.
- The It is painful to look after myself and I am slow and careful.
- I need some help, but manage most of my personal care.
- I need help every day in most aspects of self care.
- D I do not get dressed, I wash with difficulty and stay in bed.

3. LIFTING

- I can lift heavy weights, without extra pain.
- ® I can lift heavy weights, but it gives extra pain.
- @ Pain prevents me from lifting heavy weights off the floor, but I can if they are conveniently positioned, for example, on a table.
- Pain prevents me from lifting heavy weights, but I can manage light to medium weights if they are conveniently positioned.
- I can lift very light weights.
- D I cannot lift or carry anything at all.

4. READING

- D I can read as much as I want to with no pain in my neck.
- D I can read as much as I want to with slight pain in my neck.
- © I can read as much as I want with moderate pain in my neck.
- D I cannot read as much as I want because of moderate pain in my
- D I cannot read as much as I want because of severe pain in my neck.
- D I cannot read at all.

5. HEADACHES

- I have no headaches at all.
- I have slight headaches which come infrequently.
- I have moderate headaches which come infrequently.
- D I have moderate headaches which come frequently.
- I have severe headaches which come frequently.
- D I have headaches almost all the time.

6. CONCENTRATION

- I can concentrate fully when I want to with no difficulty.
- I can concentrate fully when I want to with slight difficulty.
- Thave a fair degree of difficulty in concentrating when I want to.
- I have a lot of difficulty in concentrating when I want to.
- I have a great deal of difficulty in concentrating when I want to.
- D I cannot concentrate at all.

7. WORK

- I can do as much work as I want to.
- I can only do my usual work, but no more.
- T can do most of my usual work, but no more.
- I cannot do my usual work.
- T can hardly do any work at all.
- I cannot do any work at all.

8. DRIVING

- I can drive my car without any neck pain.
- I can drive my car as long as I want with slight pain in my neck.
- I can drive my car as long as I want with moderate pain in my neck.
- I cannot drive my car as long as I want because of moderate pain
- I can hardly drive at all because of severe pain in my neck.
- D I cannot drive my car at all.

9. SLEEPING

- I have no trouble sleeping.
- My sleep is slightly disturbed (less than 1 hour sleepless).
- My sleep is mildly disturbed (1-2 hours sleepless).
- My sleep is moderately disturbed (2-3 hours sleepless).
- My sleep is greatly disturbed (3-5 hours sleepless).
- My sleep is completely disturbed (5-7 hours sleepless).

10. RECREATION

- I am able to engage in all of my recreational activities, with no neck pain at all.
- I am able to engage in all of my recreational activities, with some pain in my neck.
- Tam able to engage in most, but not all of my usual recreational activities because of pain in my neck.

- I can hardly do any recreational activities because of pain in my
- I cannot do any recreational activities at all.

REVISED OSWESTRY LOW BACK PAIN DISABILITY QUESTIONNAIRE

Please Read: This questionnaire is designed to enable us to understand how much your low back pain has affected your ability to manage your everyday activities.

Please answer each section by darkening the **one bubble** that most applies to you. We realize that you may feel that more than one statement may relate to you, but **please**, **just pencil in the one choice which most closely describes your problem right now**.

Please use a **No. 2 pencil** to fill in your answers. Fill in bubbles **completely** as indicated here: **Erase** changes cleanly. Do **not fold** this form.

From: N.Hudson, K. Tome-Nicholson, A Breen; 1989 Revised 09/11/92

1. PAIN INTENSITY

- The pain comes and goes and is very mild.
- The pain is mild and does not vary much.
- The pain comes and goes and is moderate.
- The pain is moderate and does not vary much.
- The pain comes and goes and is severe.
- The pain is severe and does not vary much.

2. PERSONAL CARE

- I would not have to change my way of washing or dressing in order to avoid pain.
- I do not normally change my way of washing or dressing even though it causes some pain.
- Washing and dressing increases the pain, but I manage not to change my way of doing it.
- Washing and dressing increases the pain and I find it necessary to change my way of doing it.
- Because of the pain, I am unable to do some washing and dressing without help.
- Because of the pain, I am unable to do any washing or dressing without help.

3. LIFTING

- I can lift heavy weights without extra pain.
- D I can lift heavy weights, but it causes extra pain.
- Pain prevents me from lifting heavy weights off the floor.
- Pain prevents me from lifting heavy weights off the floor, but I can manage if they are conveniently positioned, e. g., on a table.
- Pain prevents me from lifting heavy weights, but I can manage light to medium weights if they are conveniently positioned.
- D I can only lift very light weights, at the most.

4. WALKING

- Pain does not prevent me from walking any distance.
- Pain prevents me from walking more than one mile.
- Pain prevents me from walking more than 1/2 mile.
- Pain prevents me from walking more than 1/4 mile.
- I can only walk while using a cane or on crutches.
- I am in bed most of the time and have to crawl to the toilet.

5. SITTING

- I can sit in any chair as long as I like without pain
- D I can only sit in my favorite chair as long as I like.
- Pain prevents me from sitting more than one hour.
- Pain prevents me from sitting more than 1/2 hour.
- De Pain prevents me from sitting more than ten minutes.
- Pain prevents me from sitting at all.

6. STANDING

Patient Name:

- I can stand as long as I want without pain.
- I have some pain while standing, but it does not increase with time.
- © I cannot stand for longer than one hour without increasing pain.
- D I cannot stand for longer than 1/2 hour without increasing pain.
- © I cannot stand for longer than ten minutes without increasing pain.
- © I avoid standing, because it increases the pain straight away.

7. SLEEPING

- D I get no pain in bed.
- D I get pain in bed, but it does not prevent me from sleeping well.
- Because of pain, my normal night's sleep is reduced by less than one-quarter.
- Because of pain, my normal night's sleep is reduced by less than one-half.
- Because of pain, my normal night's sleep is reduced by less than three-quarters.
- D Pain prevents me from sleeping at all.

8. SOCIAL LIFE

- My social life is normal and gives me no pain.
- My social life is normal, but increases the degree of my pain.
- Pain has no significant effect on my social life apart from limiting my more energetic interests, e.g., dancing, etc.
- Department Pain has restricted my social life and I do not go out very often.
- Pain has restricted my social life to my home.
- I have hardly any social life because of the pain.

9. TRAVELING

- @ I get no pain while traveling.
- I get some pain while traveling, but none of my usual forms of travel make it any worse.
- I get extra pain while traveling, but it does not compel me to seek alternative forms of travel.
- I get extra pain while traveling which compels me to seek alternative forms of travel.
- De Pain restricts all forms of travel.
- Pain prevents all forms of travel except that done lying down.

10. CHANGING DEGREE OF PAIN

- My pain is rapidly getting better.
- My pain fluctuates, but overall is definitely getting better.
- My pain seems to be getting better, but improvement is slow at present.
- My pain is neither getting better nor worse.
- My pain is gradually worsening.
- My pain is rapidly worsening.

Patient Informed Consent

Congratulations on choosing chiropractic health care. This clinic believes it is the safest, most natural health care delivery system in the world today. Chiropractic adjustments (chiropractic manipulative therapy; C.M.T.) and other care procedures are safe and cost effective.

All health care professionals (anesthesiologist, chiropractors, dentist, medical doctors, osteopaths, pharmacists, surgeons, etc.) are regulated by laws and boards. These health care professionals are required to give you, the patient, advance notice of any care risk, because health care is not an exact science. It is not reasonable to expect any doctor to foresee all risk and/or complications. Informed consent information regarding and risk such as paraplegia, quadriplegia, brain damage, stroke, disc injury breaks, drug reactions, death or loss of function of any organ or limb, or disfiguring scars associated with physical care, drugs, surgery and/or treatment is an undesirable result, but it does not necessarily indicate an error in clinical judgment. No guarantee of cure or results has been made to you, the patient in this clinic. Your care may involve the making of recommendations based upon facts known to the doctor at this time. Chiropractic care does not use drugs or surgery, and does not diagnose internal and/or medical conditions.

For your information the following is furnished to all patients who request and/or accept chiropractic care in this clinic. Again, chiropractic care does not use drugs or surgery, and does not diagnose internal and/or medical conditions. This clinic is staffed with graduated chiropractors who are licensed and recognized by government agencies regulating all the aforementioned health arts.

Chiropractic is the science that concerns itself with the relationship between the brain, central nervous system, spine, and the function of the body. Any alteration of this relationship can cause the biomechanical and neurophysiological dynamics of the contiguous spinal and paraspinal structures to be disrupted. This can cause neuronal disturbances in the form of the vertebral subluxation complex (V.S.C.) with its physical and chemical components, which can then interrupt the body's inherent recuperative powers.

The practice of chiropractic can include exams and diagnostic testing. In some cases, this includes the utilization of specialized instrumentation, lab tests, radiological exams, nutritional and/or physical therapy, and rehabilitation procedures, etc. There is a special procedure unique to chiropractic: the chiropractic adjustment (chiropractic manipulative therapy-C.M.T.) Adjustments are made by chiropractors to correct and/or reduce and/or stabilize the nerve interference caused by the VSC and its component parts. There are over 200 different adjusting techniques, some using specialized equipment. Adjustments are usually performed by hand but may be performed by hand-guided instruments. A C.M.T. is the application of a specific force, applied to a segmental contact point, usually on a vertebra, to reduce or stabilize the V.S.C. and its component parts.

You should understand the benefits of chiropractic health care, but you also need to be aware of some of the limited inherent risks. These occur seldom enough to contraindicate care but should be considered in your informed decision to receive chiropractic care.

All health care procedures have some risk. With C.M.T.'s these risks may include musculoskeletal sprain/strain, disc injuries, dislocations, fractures, neurological deficits, Horner's syndrome, Vertebral Artery Syndrome (V.A.S.), stroke, etc. The chances of this occurring have been estimated by experts to be approximately only 1 per 400,000 treatments, to 1 per 1,000,000 treatments.

Appropriate tests will be performed to identify if you may be susceptible to these risk, and you will be notified, in that case. If you have any questions about these issues, please do not hesitate to speak with your doctor of chiropractic.

I have read (or have had read to me) the above information. I wish to rely on the doctor's judgment during my course of care, based on the facts then known. I have also had opportunity to ask questions regarding

the above information and possible consequence chiropractic care procedures recommended and guarantee of cure has been made to me concern	performed. I have no questions,	now agree to have the and I acknowledge no
